All suppliers are to ensure that they are able to deliver at a minimum fibre links to the 4 locations listed above also known as Option A and Option B.

Furthermore, should the city have opted for Option A at contract commencement, the city may decide to migrate to Option B during the contract period due to voice infrastructure being relocated. In this case the city may either continue to make use Option A services, or cancel the Option A service.

Each fibre link:

- Fibre link cannot be shared with other data services, link is only for VoIP traffic (SIP Trunks)
- Fully managed and provided by the supplier, fibre remains the property of the service provider.
- Each physically capable of transporting up to 400 – 600 SIP Channels
- Supplier must monitor and report on the capacity and availability of the fibre link

- From time to time the City may request a manual failover for the purposes of BCP testing and maintenance work.
- The City will be responsibility for the failover of outgoing call from one SIP trunk to the other.

The City expects to retain its current number range. It will therefore be expected that the primary supplier must be able to manage geographic and non-geographic number porting and manage the number range accordingly (Schedule 15J). The supplier need to make sure that number porting is part of the pricing as the city will not pay any additional costs for this other than pricing that's submitted as part of the pricing schedule.
